

Backpack L shape type structure home elevator

背包架结构别墅电梯

背包架结构别墅电梯顾名思义就像学生背书包，对重及轿厢导轨位于轿厢的同一侧，对电梯井道要求低。

The backpack L shape type structure home elevator is just like the student's backpack, the counterweight and the car guide rail are located on the same side of the car, and this type has less requirements to the shaft.

背包架结构的特点:

背包式结构家用电梯，主要针对家庭内较窄并且特深的井道，同时，这种结构的家用电梯也是90°角双轿门电梯的不二选择。

Characteristics of backpack L shape type structure:

The backpack L shape type structure home elevator is mainly for narrow and deep wells in the house. At the same time, this structure is also the best choice for 90 degree adjacent car door.
